

Mean Systolic Blood Pressure (mmHg) over time by arm

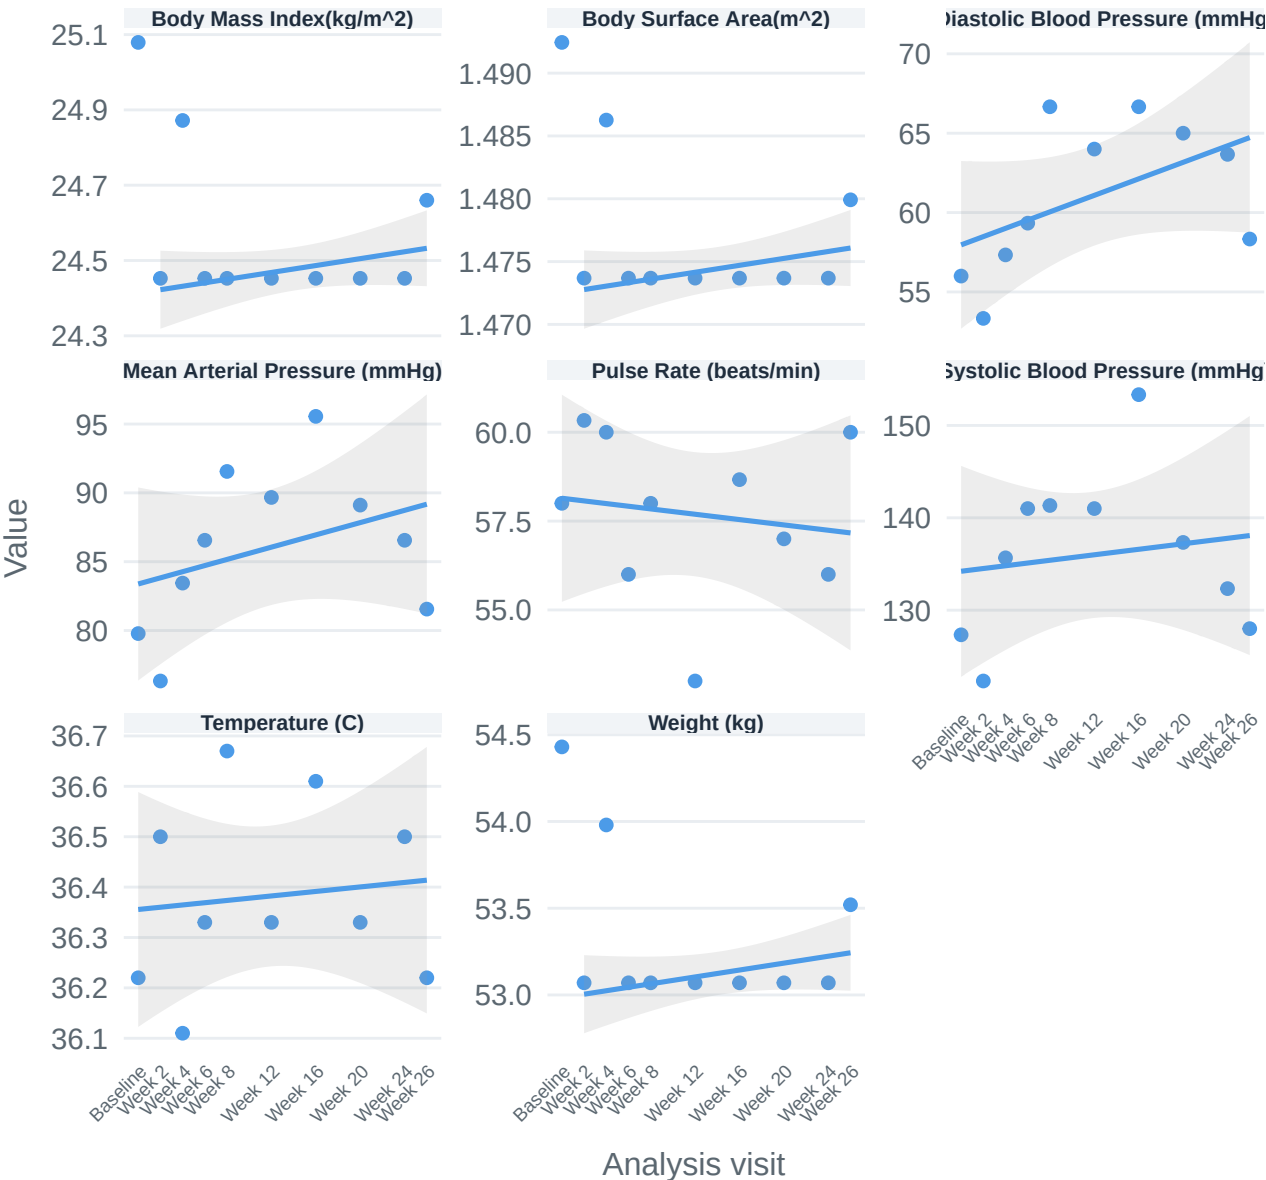

All scheduled visits shown; linear fit excludes statistical outliers

Points = all scheduled visits; regression uses non-outlier visits only (IQR + studentized residuals)

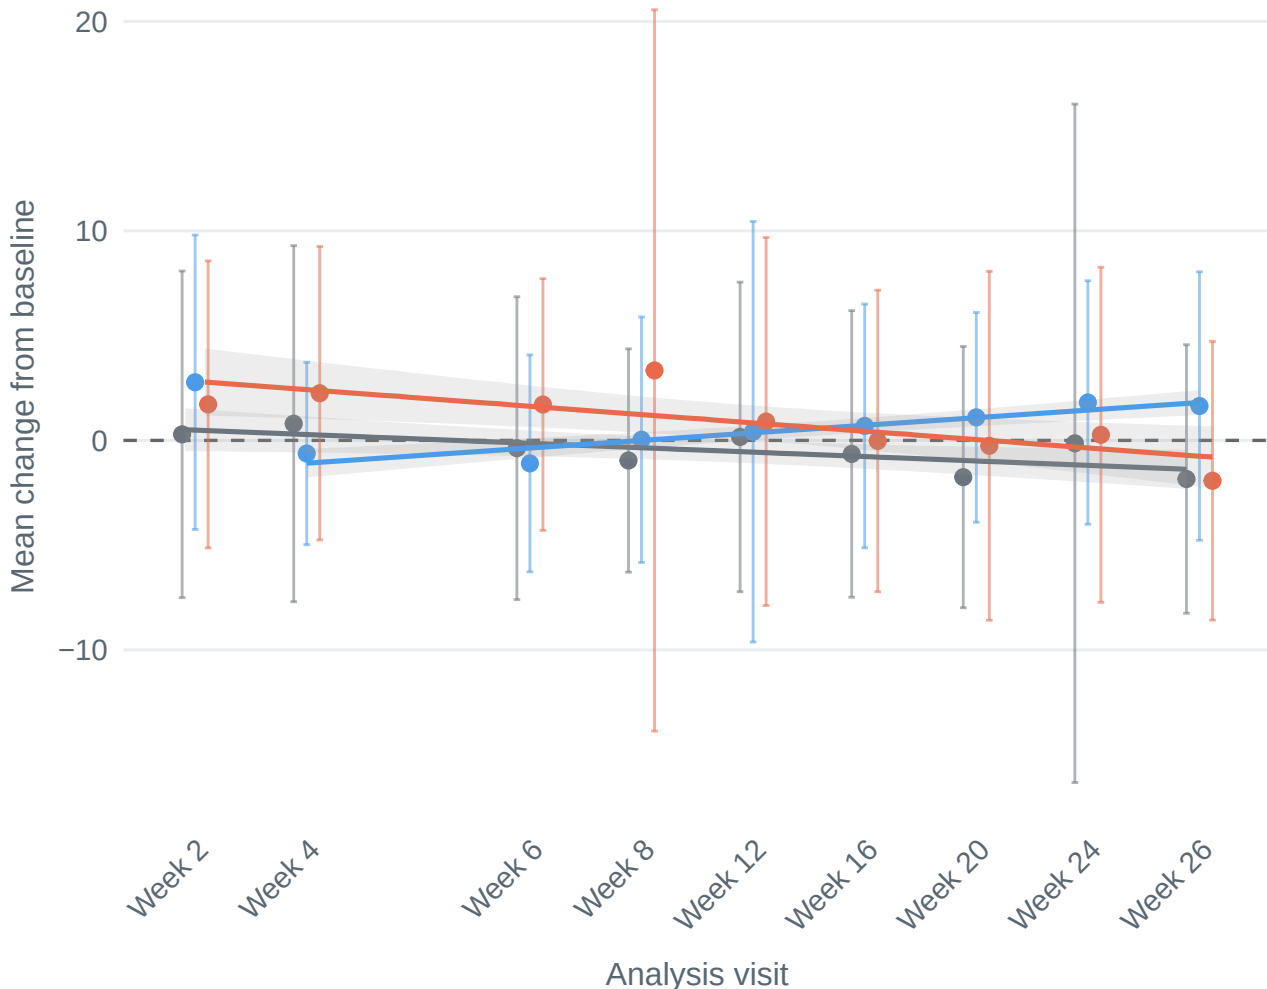

Vital signs — 01-701-1015

All scheduled visits shown; linear fit excludes statistical outliers

Mean change from baseline — Alanine Aminotransferase (U

All scheduled visits shown; linear fit excludes statistical outliers

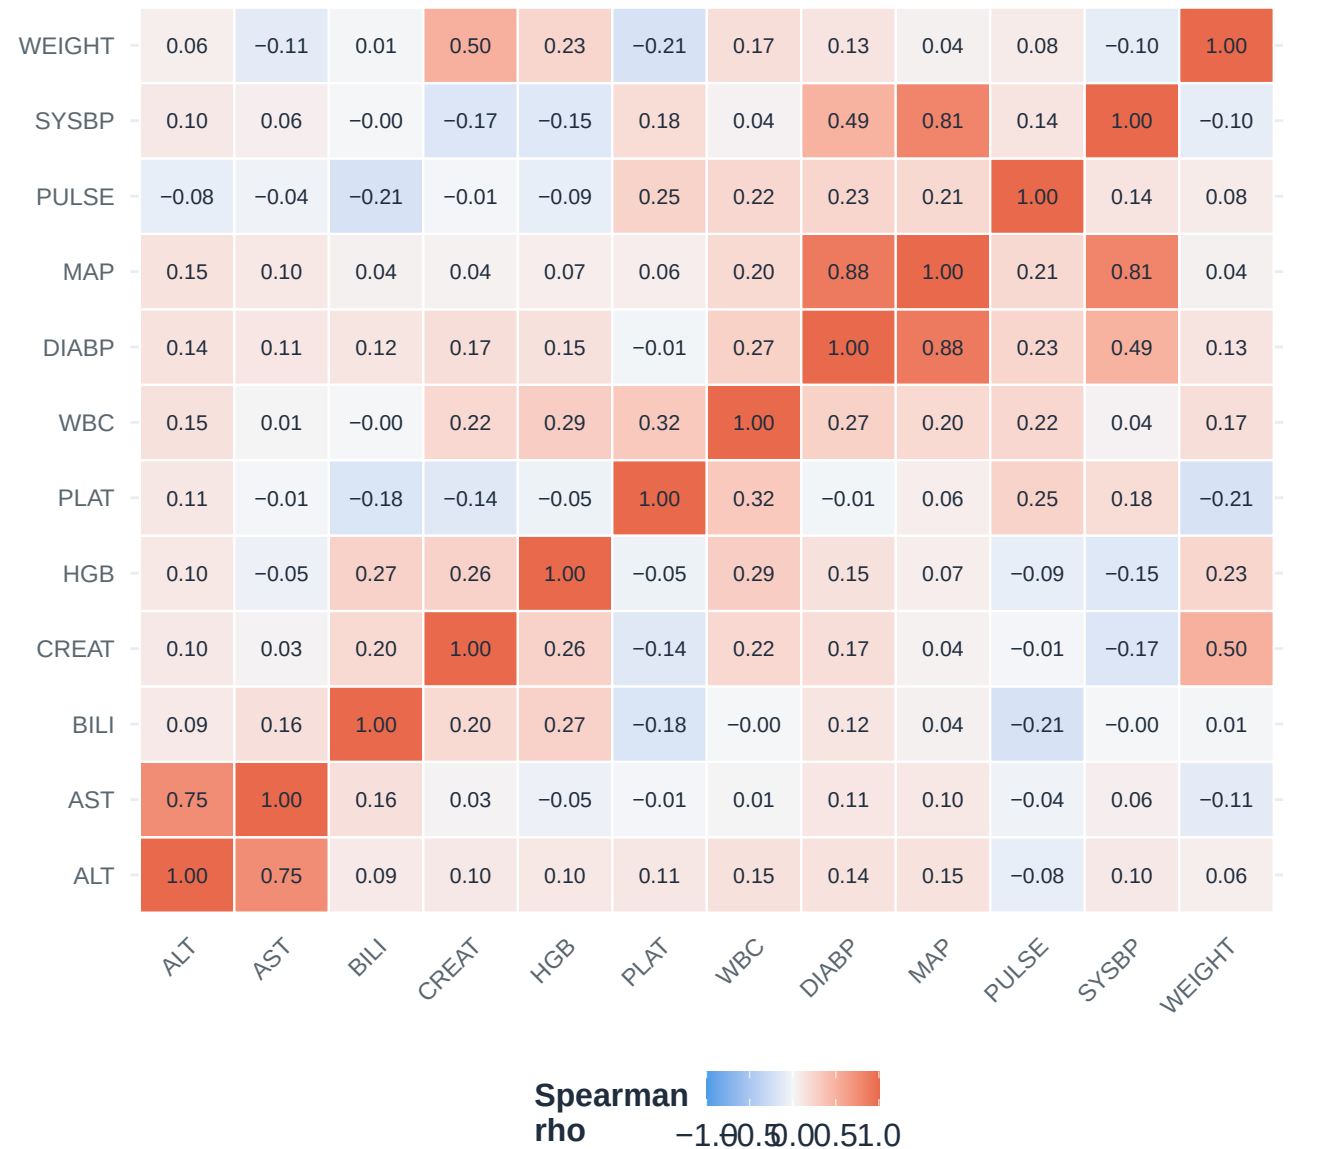

Arm Placebo Xanomeline Low Dose Xanomeline High Dose

Points = all scheduled visits; regression uses non-outlier visits only (IQR + studentized residuals)

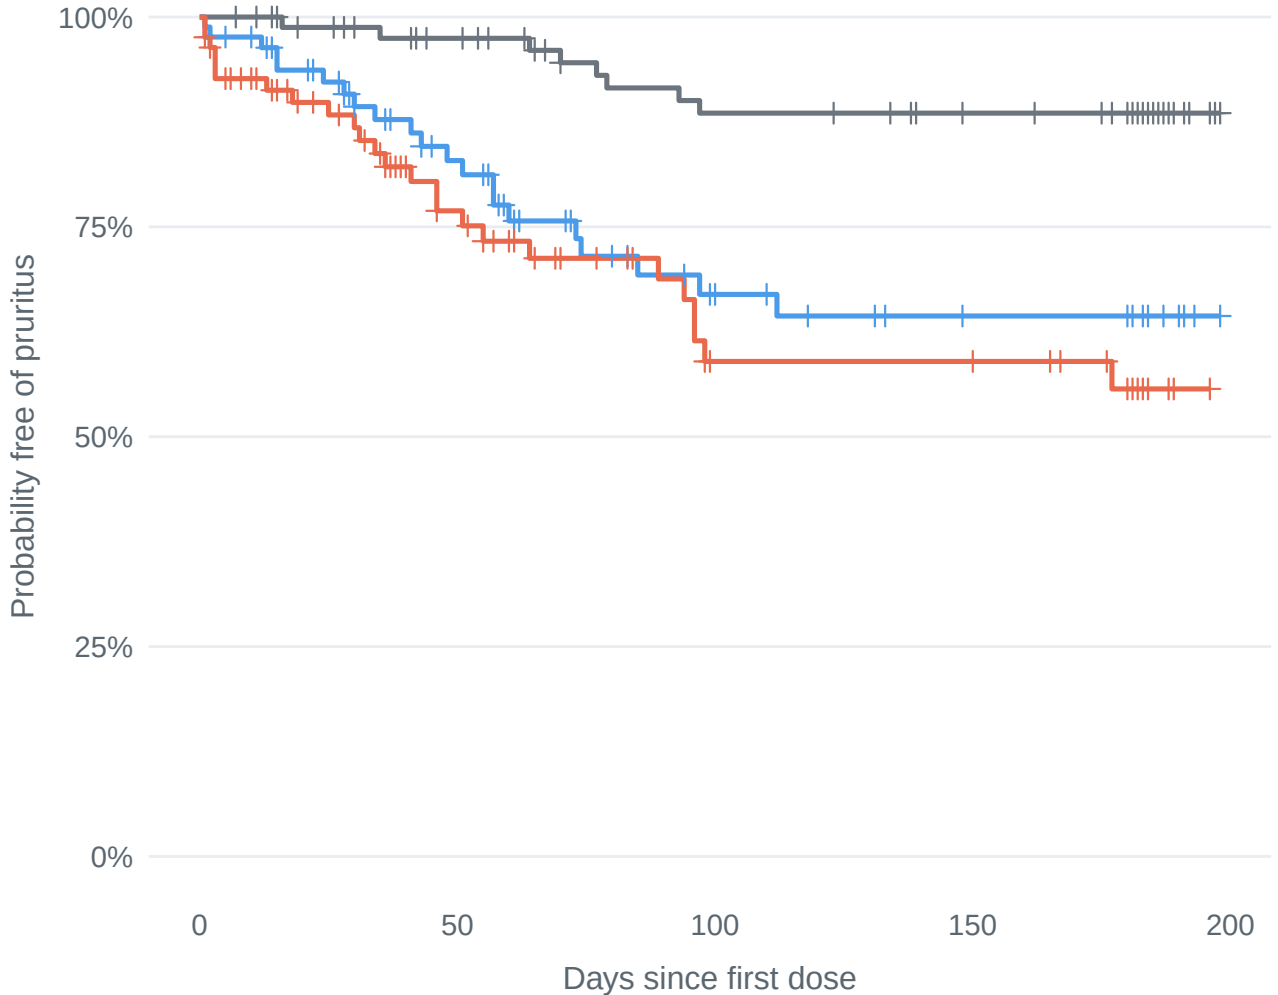

Spearman correlation — Placebo

Max post-baseline safety parameters (pairwise complete observations)

Time to first pruritus by arm

Kaplan-Meier (event-free survival) – KMG01 | Log-rank $p < 0.001$

Arm — Placebo — Xanomeline Low Dose — Xanomeline High Dose

Event = first occurrence of PRURITUS (TRTEMFL = 'Y'); + = censored at last dose + 1 day
